

Microsoft 365 Drive Item Permissions

By Site and Document Library

Report Generated: Friday, April 2, 2021

Permissions Summary

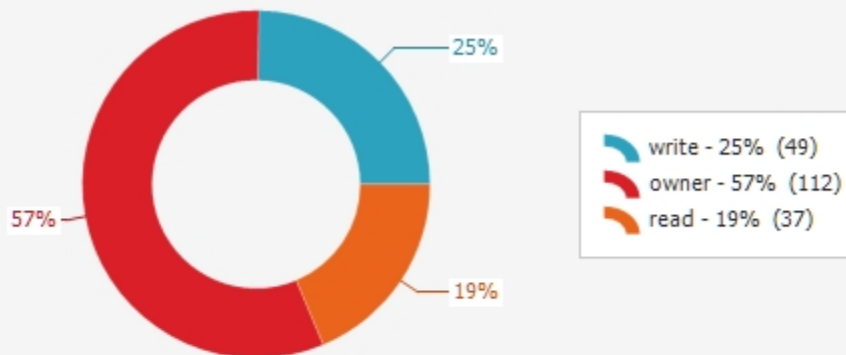

Distribution by Permission Type

Direct Permission - These permissions are directly assigned to a specific folder or file and may only be associated with a user, group or other security principals (such as devices or applications) defined within the tenant.

Sharing Link - This permission type is directly assigned to a specific file or folder but has a varied number of attributes (password, expiration, etc.) that are unique to this permissions types.

Distribution by Access Type

Read - Grants the privilege to view the associated file or folder contents.

Note: Depending on the file type, an associated *prevents_download* flag may be set that limits read access to viewing online only.

Write - Grants Read as well as the privilege to edit the assigned file or folder contents.

Note: For Word documents (*.docx files), an associated link type of *review* may be set only allowing review comments editing, but not content editing.

Owner (sp.full_control) - Grants Read and Write, as well as change permissions access.
